

UN2897 1 of 2 21 st APR 2020	Electronic Staff Record Programme USER NOTICE	
Title	Updates to the Occupational Health Immunisations and Checks	
Purpose	To advise users of the addition of SARS-CoV-2 testing	
Intended Audience	All HR and Occupational Health users	

SUBJECT

Updating Occupational Health records to record SARS-CoV-2 testing

DETAIL

With the expected increase in testing for NHS employees for the virus SARS-CoV-2, which is the cause of the COVID-19 disease, an update to the existing Occupational Health Immunisations and Checks information will be made in Release 45.2 (1st May 2020) subject to completion of development and testing.

Following consultation with the OH Steering Group (England), led by representatives from NHS England & Improvement and colleagues in Wales Occupational Health networks the agreed data being recorded includes:

New Immunisations & Checks value – Coronavirus

Segments:

- 1) Type: SARS-CoV-2
- 2) Antigen (RNA swab) Test Result: Detected/Not Detected/Equivocal
- 3) Antigen (RNA swab) Test Date: DD/MMM/YYYY
- 4) Antibody Test Result: Detected/Not Detected/Equivocal
- 5) Antibody Test Date: DD/MMM/YYYY

In addition the reports available to the holders of the Occupational Health User Responsibility Profile:

- NHS OH Data Extract Report
- NHS OH Individual Employee Summary Report
- NHS OH Staff List by Individual Test or Immunisation

We have also acknowledged the need to:

- Enable interface capability to match existing processes with OH data for 3rd Party providers
- Update IAT to ensure this is included in the Pre and Post hire processes
- Update the PDF available to Employees and Applicants from their My Personal Details portlet.
