

<p>UN2998 1 of 3 24 February 2021</p>	<p>Electronic Staff Record Programme USER NOTICE</p>	
<p>Title</p>	<p>Merge February 2021 and Release 48 3 0 0 - Notification of Downtime</p>	
<p>Purpose</p>	<p>To inform users of planned ESR downtime for a Merge & Release</p>	
<p>Intended Audience</p>	<p>All ESR & DW Users</p>	

SUBJECT

Users are advised that the ESR Production Service, e-Learning, ESRBI, ESR Data Warehouse, ESR Portal and TRS will be withdrawn at 18:00 on Friday 26th February 2021, in order to carry out a Merge and Release 48.3.0.0.

The ESR Hub will be available throughout the period of downtime.

DETAIL

Release Notices detailing the content of R48.3.0.0 will be issued later this week.

The period of downtime is estimated to be 54 hours and the Service is expected to become available by 23:59 Sunday 28th February 2021.

Users are asked to note the 18:00 closure time for the on-line Service on Friday and co-operation is requested to ensure that all Users are logged off by 18:00.

Users are also advised that the ESR batch queues will be held from 16:00 on Friday to ensure that no batch work is running when the service is withdrawn at 18:00.

Please Note:

Any pay-related jobs that need to complete before the system closedown at 18:00 must be submitted well in advance of the 16:00 cut-off in order for them to be completed by 18:00. This includes payroll, prepayments, print pay advice, RTI Processes and transmit BACS.

To ensure that jobs are completed by 18:00, and therefore the period of downtime is not unnecessarily delayed, there will be active management of related queues from 10:00 on Friday that may result in processes showing as 'Inactive No Manager'. If a process must be run and complete before the downtime period commences, please raise an appropriate 'Report an Issue' P3 SR detailing the RequestID and reason for the request to be released so this can be reviewed and assessed.

Users are advised not to submit jobs to run "as soon as possible" before 16:00 on Friday that might be expected to run past 18:00, but to schedule these to run after the advertised downtime is complete. Any jobs which are still running at 18:00 on Friday will be aborted to ensure that the release can be deployed within the downtime window.

Title	Merge February 2021 and Release 48 3 0 0 - Notification of Downtime	
Purpose	To inform users of planned ESR downtime for a Merge & Release	
Intended Audience	All ESR & DW Users	

ESR BI REPORTING DATA

Whilst the BI reporting solution will be available on Monday 01st March, the data may not be up to date. An anticipated schedule of data availability in ESR BI is provided below:

- Monday 01st March – data will be as at 18:00 on Thursday 25th February. The BI service maybe withdrawn for a small period of time on Monday 01st March to enable updated data to be made available to the merging trusts.
- Tuesday 02nd March - data will be as at 18:00 on Monday 01st March.

These timelines are based on current estimates, however if the anticipated schedule changes, an updated schedule will be provided in a user notice with updated information. If no additional notice is issued, users are advised to work to this schedule.

ACTION REQUIRED

Organisations are advised to ensure that they internally communicate the downtime to all Self Service and Learning users.

Processes submitted on Friday that are expected to take several hours to run should be scheduled to run after the advertised downtime completion time.

For processes that are required prior to 18:00 on Friday but are showing 'Inactive No Manager', raise an appropriate 'Report an Issue' P3 SR detailing the RequestId and reason for request to be released.

The service will be temporarily available for periods on Sunday 28th February. This is to allow the impacted Employing Authorities to perform necessary post merge checks.

Users should be aware that while the service may appear to be available during this time it is intended to be used only by the merging Authorities and will be withdrawn without notice should this become necessary.

We therefore strongly advise all users not to access the Production system until the stated end of the downtime period.
