| Title | NHS Digital Care Identity Service Migration to the Cloud | |
| Purpose | Provide an update on the migration schedule | |
| Intended Audience | ESR – Smartcard & Registrations Users | |

SUBJECT

NHS Digital Care Identity Service Migration

DETAIL

Following on from User Notices 3034 and 3039; and as per the NHS Digital CIS Live Changes service update (see further information below), the Live Care Identity Service (CIS), which is used for ESR Smartcard Authentication and ESR Registrations transactions, is still due to be migrated to the Cloud by NHS Digital.

The transition has been re-scheduled to take place from Friday 9th July 2021 at 18:30 and is expected to complete Monday 12th July by 20:30.

During this period, Smartcard Authentication will remain available. However, as the Care Identity Service application will be unavailable, ESR Interface to CIS Registrations services will be unavailable (including ESR RA Workbench functionality such as new Smartcard and Smartcard record association requests). These requests will be held and queued during this period and will be sent once the service is re-enabled.

ACTION REQUIRED

Please ensure your organisation has reviewed the information provided by NHS Digital in the link below:
