Ref ID	Description	Process Area
PRB2001417	<p><b>Automated IAT's failing</b></p> <p>There has been an issue affecting the IAT Update Competency Message Notification for the NHS IAT STAT and Mand Competency Approval. The issue is specifically when processing this notification if it was initiated prior to January 2020 (R44). It resulted in the error below being returned in an update notification received after attempting to approve the original notification:</p> <p>ORA- 20002: 3103: Attribute "XX_PARENT_IAT_ITEMKEY" does not exist for item 'XXIATCMP/219137'</p> <p>A change has been applied and all un-actioned notifications can now be processed successfully.</p> <p>Where users have attempted to approve these notifications prior to this fix they will need to either apply the update manually or reinitiate the IAT for the employee to update the competency.</p> <p>We apologise for the inconvenience this will cause in completing the IAT process.</p>	HR \ IAT
PRB2001366	<p><b>Subjective costing notifications are sent to users who are no longer enabled in the Payroll Super Admin role</b></p> <p>The issue with the notifications received by Users who no longer exist in the main role has been resolved.</p>	Notifications \ Payroll \ ESR Generated
