RN566 1 of 4 21st June 2024	Electronic Staff Record Programme RELEASE NOTICE	NHS
Title	Release 61.2.0.0	
Purpose	To inform Users on the content of the Release	
Intended Audience	All ESR users	

Release 61.2.0.0 will be implemented over the weekend commencing 27th June 2024. Details on the related downtime will be issued nearer the time.

Please note:
To ensure that developments made to Hub and Portal are available to all organisations, Portal Administrators who manage localised portal content should be aware that this release will require a global publish process. This will mean that any content changes that have been made in the Staging environment will be progressed to Live over the release weekend.
Portal Administrators who wish to avoid this should:
Remove changes in staging related to dashboard portlet configurations or portlet styles which are not present in Live.
If no action is taken, any content present in Staging with a status of APPROVED will be published to Live. If there is any content with a status of APPROVED which is not required in Live then this should be removed. Any content with status of DRAFT will not be available in Staging after this release.

Content is currently subject to test completion. Updates will be issued if anything is withdrawn from the release

Ref ID	Description	Process Area
-	**Alignment of fields on the class page** The fields within the Enrolment region of the Class page (Create and View) were not aligned correctly. This has now been resolved.	Application \ Configuration
PRB2002774	**IAT** The IAT process will fail if the person in the source organisation has no email address entered. This has been resolved.	HR \ IAT
PRB2002766	**Learning/Class administrators unable to update learner competencies from Compliance and Competency form.** Learning/Class administrators were unable to update learner competencies from the Compliance and Competency form. This issue is now resolved.	Learning Management \ Learning History
