<b>Title</b>	Release 64.2.0.0	
<b>Purpose</b>	To inform Users on the content of the Release	
<b>Intended Audience</b>	All ESR users	

Release 64.2.0.0 is scheduled for deployment over the weekend commencing 25<sup>th</sup> April 2025. For the related downtime, please refer to **UN3596 - Release 64.2.0.0 Notification of Downtime**.

Please note: To ensure that developments made to Hub and Portal are available to all organisations, Portal Administrators who manage localised portal content should be aware that this release will require a global publish process. This will mean that any content changes that have been made in the Staging environment will be progressed to Live over the release weekend. Portal Administrators who wish to avoid this should: Remove changes in staging related to dashboard portlet configurations or portlet styles which are not present in Live. If no action is taken, any content present in Staging with a status of APPROVED will be published to Live. If there is any content with a status of APPROVED which is not required in Live then this should be removed. Any content with status of DRAFT will not be available in Staging after this release.

Content is currently subject to test completion. Updates will be issued if anything is withdrawn from the release
