

# The Streamlined Doctors in Training Interface Refresh Webinar

December 2020

## Electronic Staff Record

# Agenda

- Background and Context
- Health Education England
- How does the Interface work?
  - Information Flow
  - The User Journey
  - Key points for successful IAT
  - Notifications
- Getting prepared to use the interface
- User Support
- Appendix

# Background and Context

**ESR - A Workforce Service delivered by the NHSBSA**

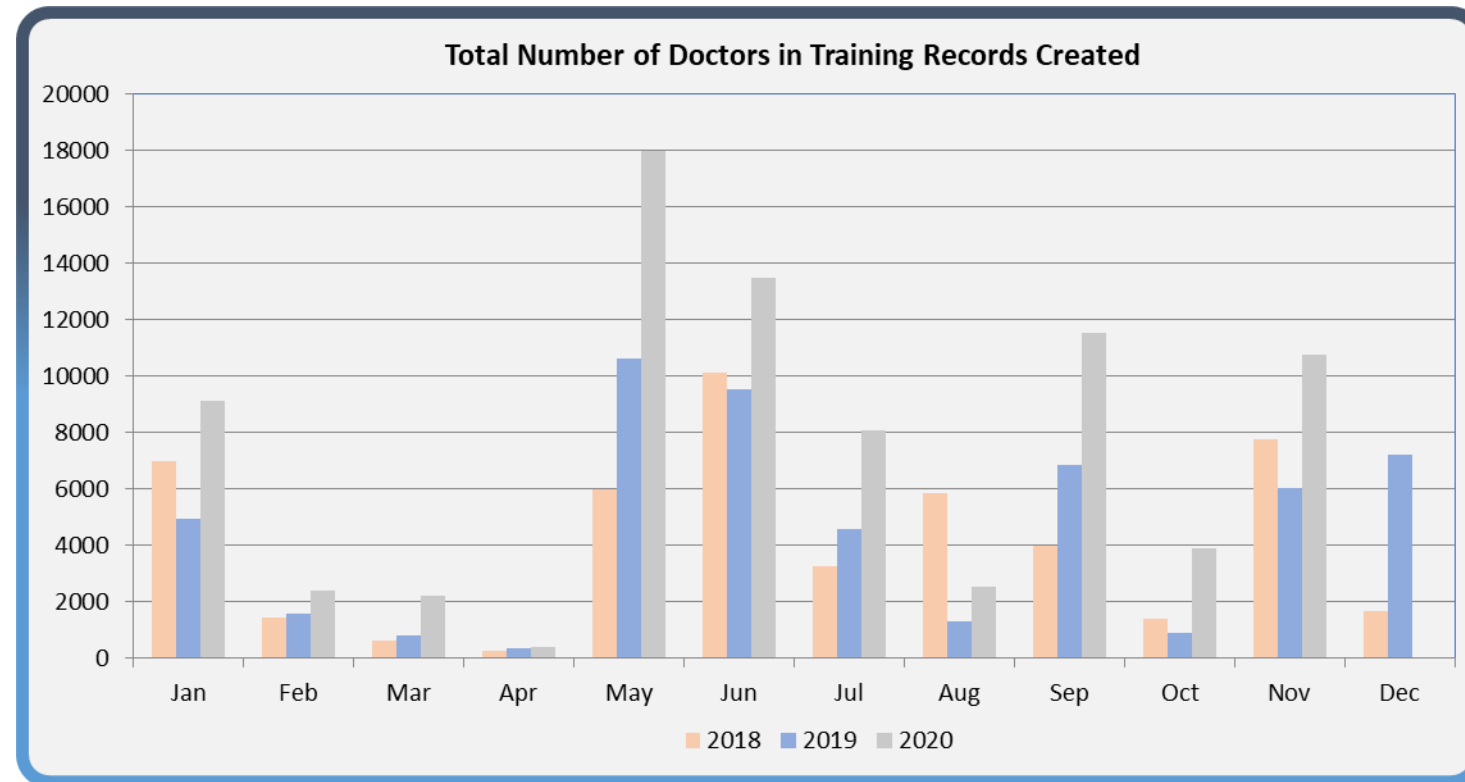

# Background

- The NHS has committed in the [Long Term Plan](#) to enable “staff move more easily from one NHS Employer to the other”. This sentiment was emphasised in the [People Plan](#)
- ESR and the HEE Teams have worked collaboratively, to help Doctors in Training move quickly and easily between employers.
- Key activities for the ESR Team have included:
  - Implementation of the interface between ESR and TIS to trusts not already using it;
  - Supporting HEE with development of their technical processes;
  - Supporting the development and rollout the ESR Person Update capability (ESR trainee updates feeding into TIS);
  - Handover to the Support Teams for operational running.

# History

- Interface process transitioned to TIS (except London) in 2018;
- The London transition took place in November 2019
- 181\* English Trusts are already operating the interface to create Applicant records within ESR for Doctors in Training;
- The interface has created over 170,000 Doctor in Training records within ESR since Q1 of 2018

\*correct as at December 2020

# How will using the interface between ESR and TIS contribute to the People Plan's objectives?

- Improves the Doctor in Training experience by reducing the data that needs to be collected from them each time they rotate;
  - Minimising data manually input into ESR;
  - Supports the Pre-Employment IAT Process;
  - Enables the Doctor in Training to review their record in the ESR Applicant Dashboard, helping them to ensure their data is correct.
- 
- A short animation has been created by HEE to illustrate the importance of NHS Organisations using the interface which is available at the following link <https://www.youtube.com/watch?v=1WSadv4PtSM&feature=youtu.be>

# Health Education England

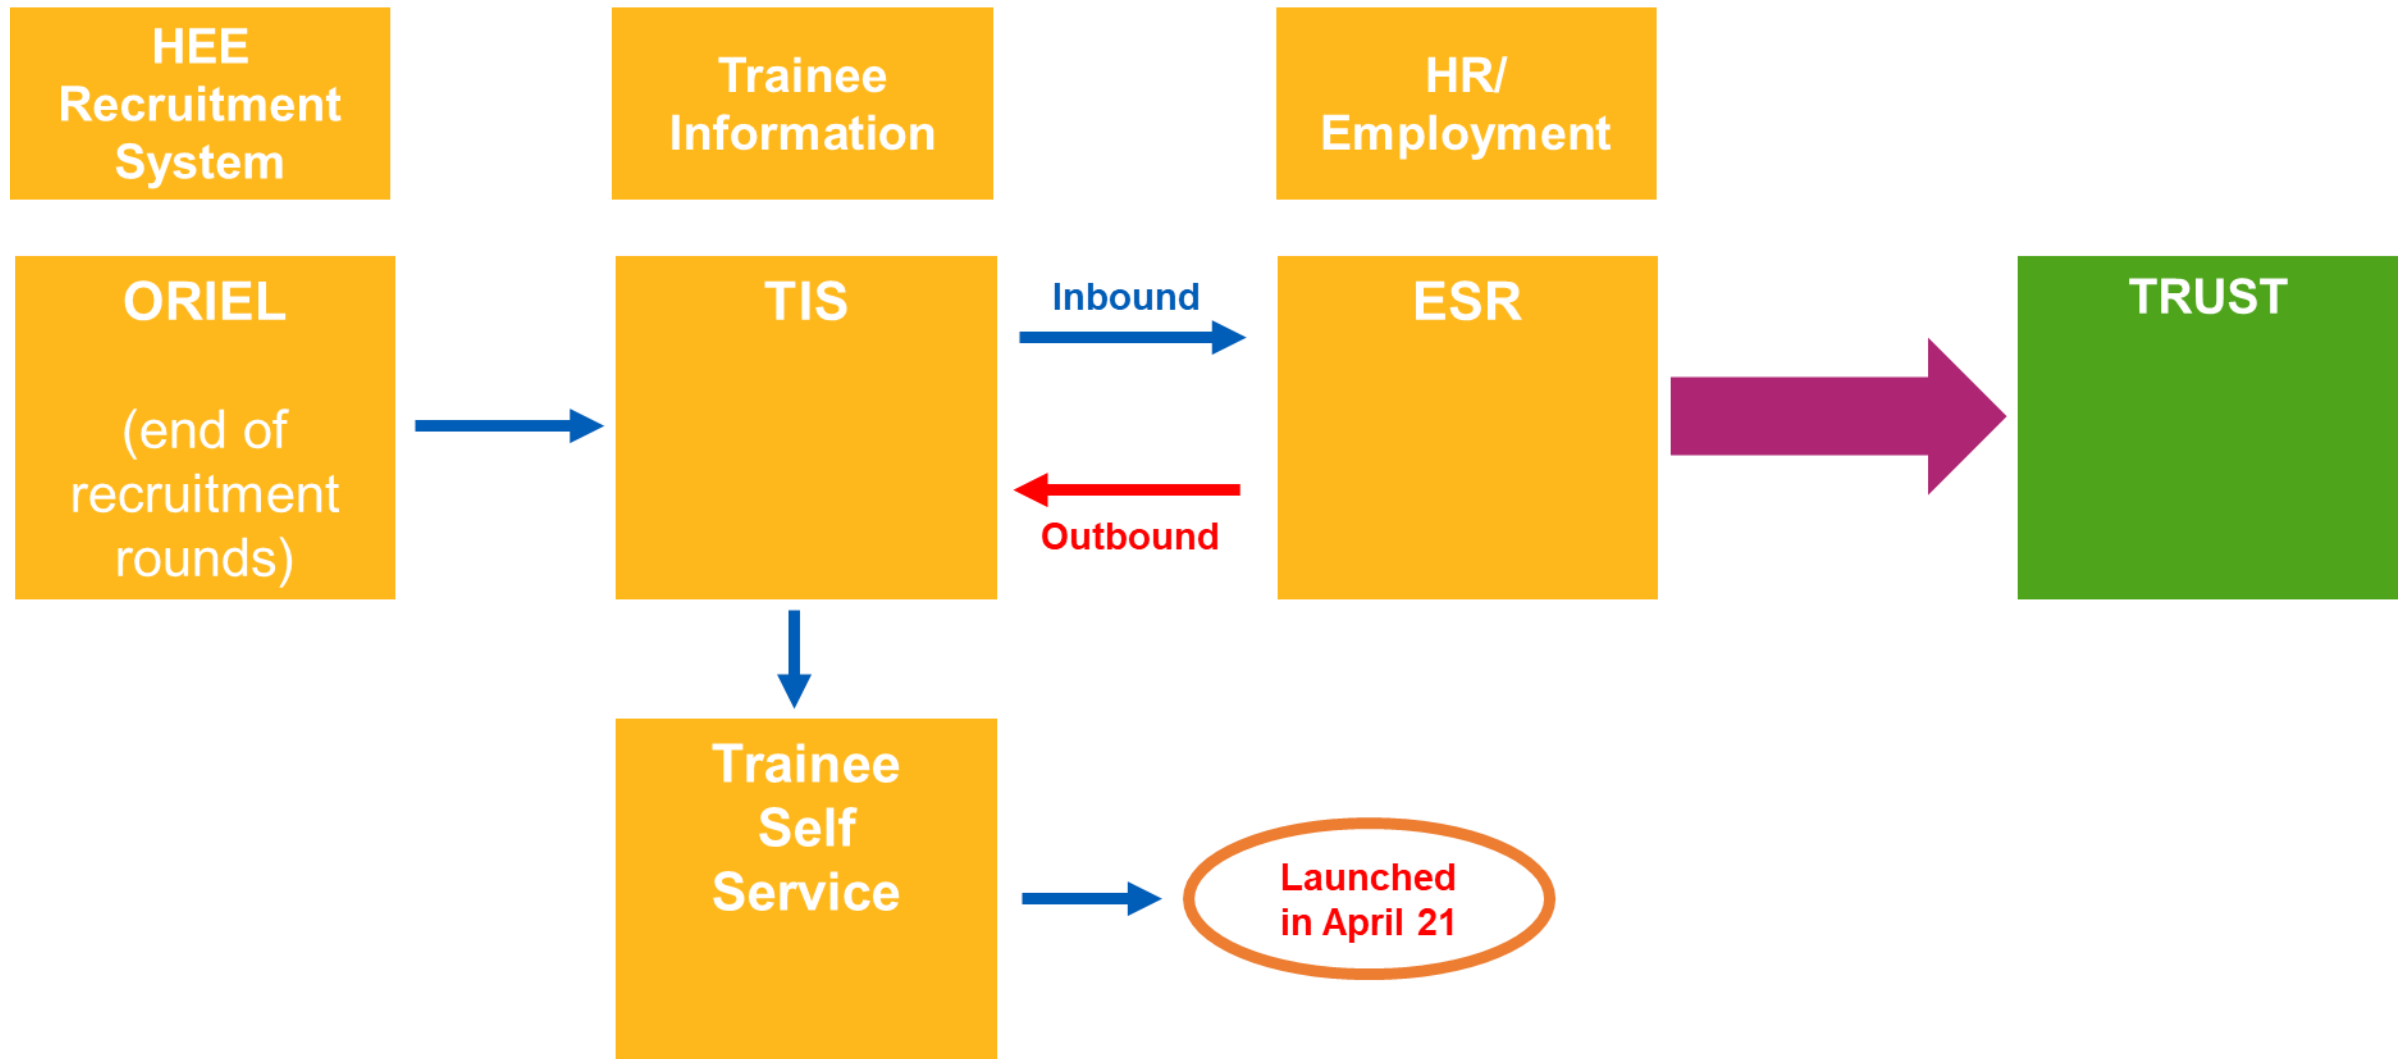

# Health Education England - Objective

- HEE working collaboratively with ESR and NHSI/E to help run efficient processes to improve the induction, rotation and onboarding experience.
- Enhance the trainee's onboarding experience and deliver systems that will drive better process and help us work smarter.
- Launching some key projects to support the Enabling Staff Movement Programme ;
  - Trust Reporting - 1<sup>st</sup> Phase implemented
  - TIS/ESR Interface rollout – Rolled out to approx. 190 Trusts
  - Bi-Directional interface – Full capability to be rolled out Jan 21
  - Trainee Self Service – In Progress
  - TPD Placement Manager – In Progress
  - Process Alignment Group – In Progress

# Interface Between TIS and ESR – Data Flow

**Questions?**

# How does the Interface work?

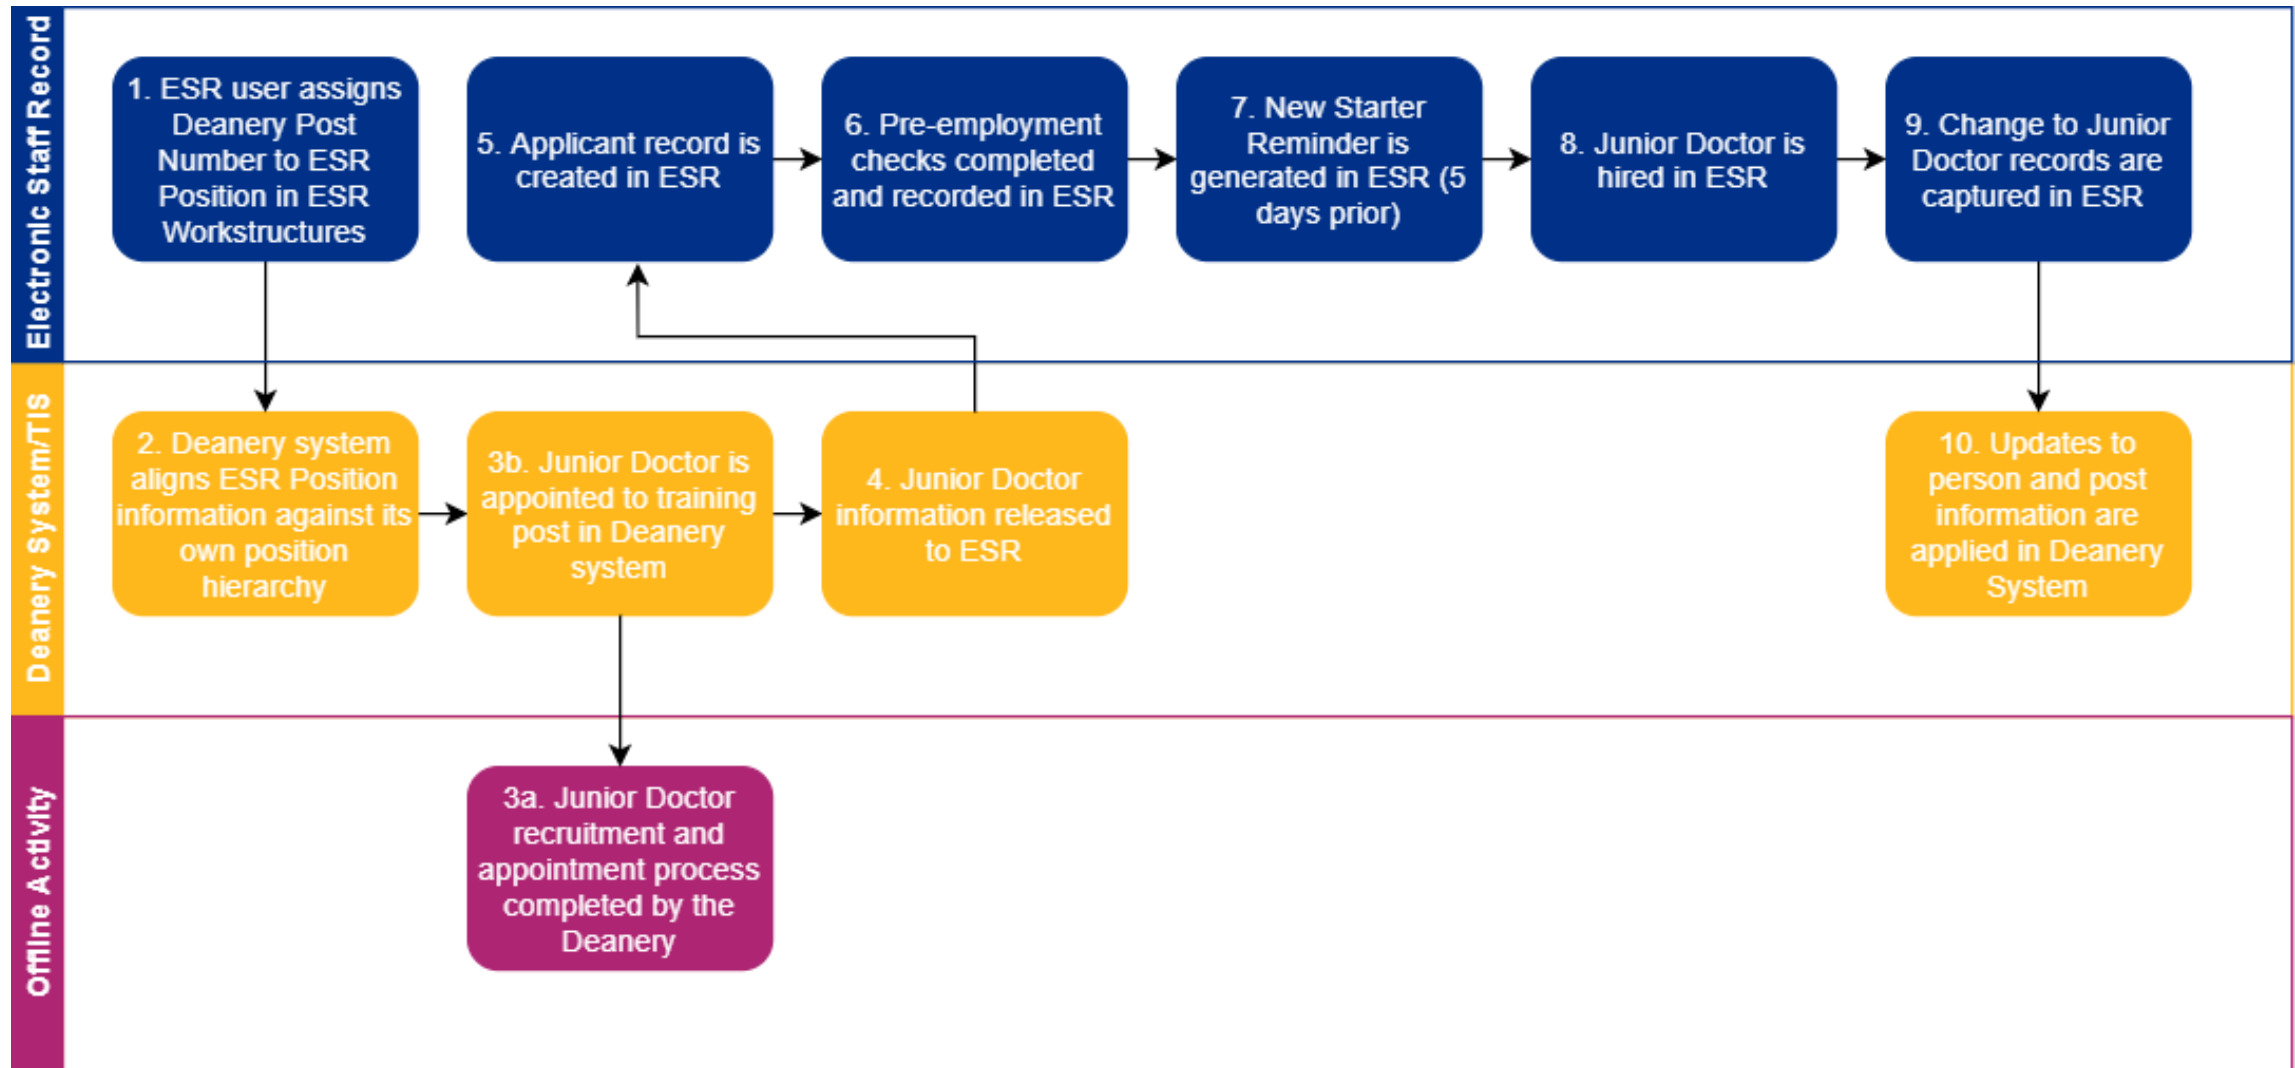

**ESR - A Workforce Service delivered by the NHSBSA**

# Information Flow

The Streamlined Doctor in Training Interface process supports the following information flows:

- **Transfer of positions** that are set up on ESR (by the Trust) to TIS.
- **Transfer of trainee doctor applicant records into ESR from TIS.** This includes new starters AND internal rotations. Applicants are generated typically between 13 and 12 weeks ahead of the start date, as TIS is programmed to release the data from 13 weeks.
- **Notifications** created within ESR detailing applicants that have been successfully loaded and those that haven't.
- **Transfer of information into ESR** about changes to placements captured within TIS.
- **Workflow notifications** generated in ESR about changes, prompting user action.
- **New Hire Reminder Notification** – generated by ESR 5 days prior to start date.

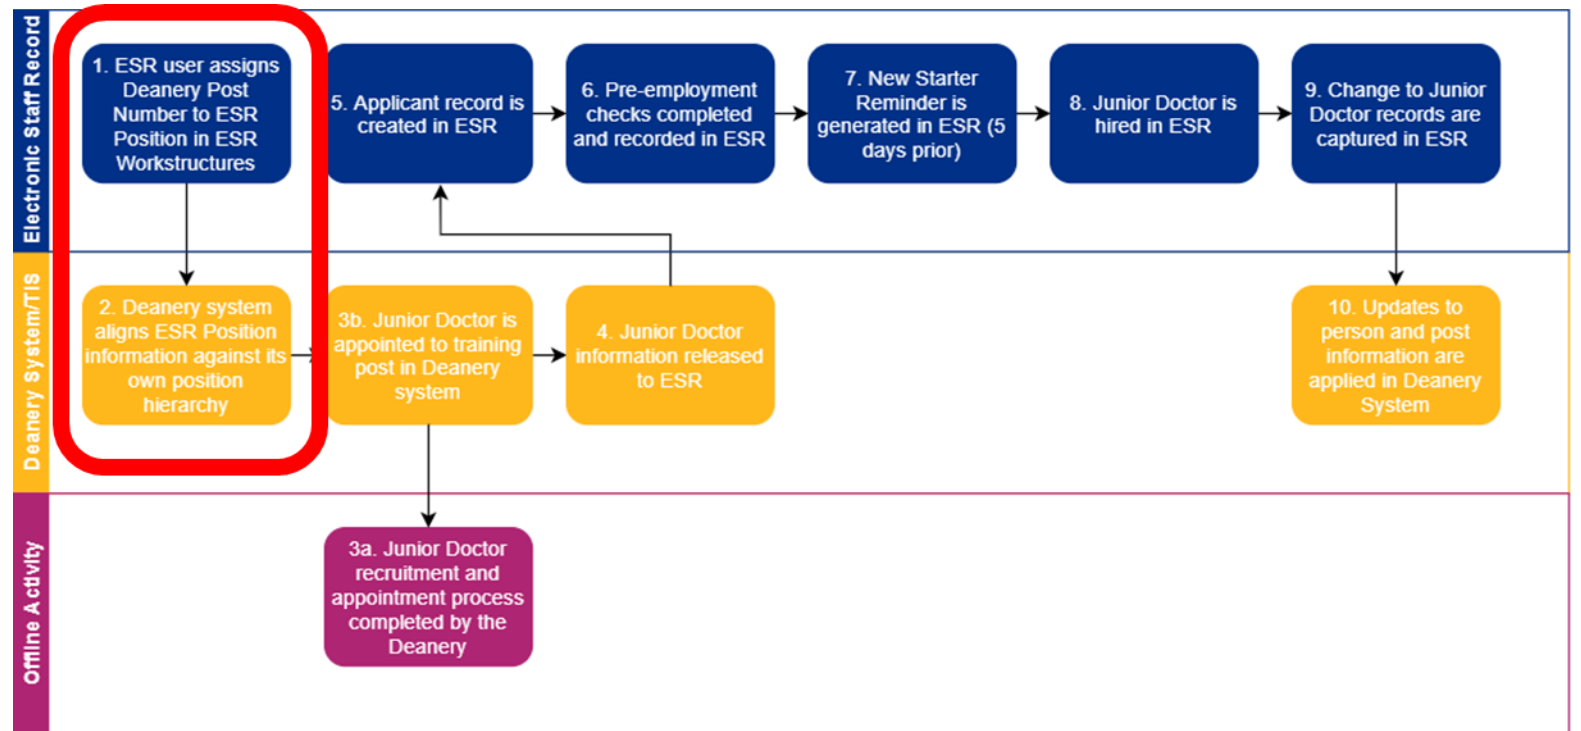

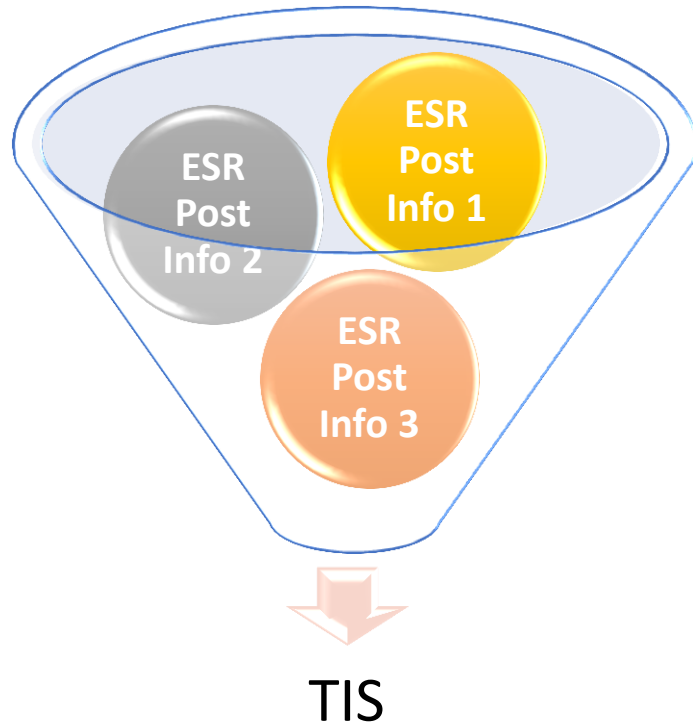

# The User Journey

# Step 1: Assign DPNs to ESR Positions

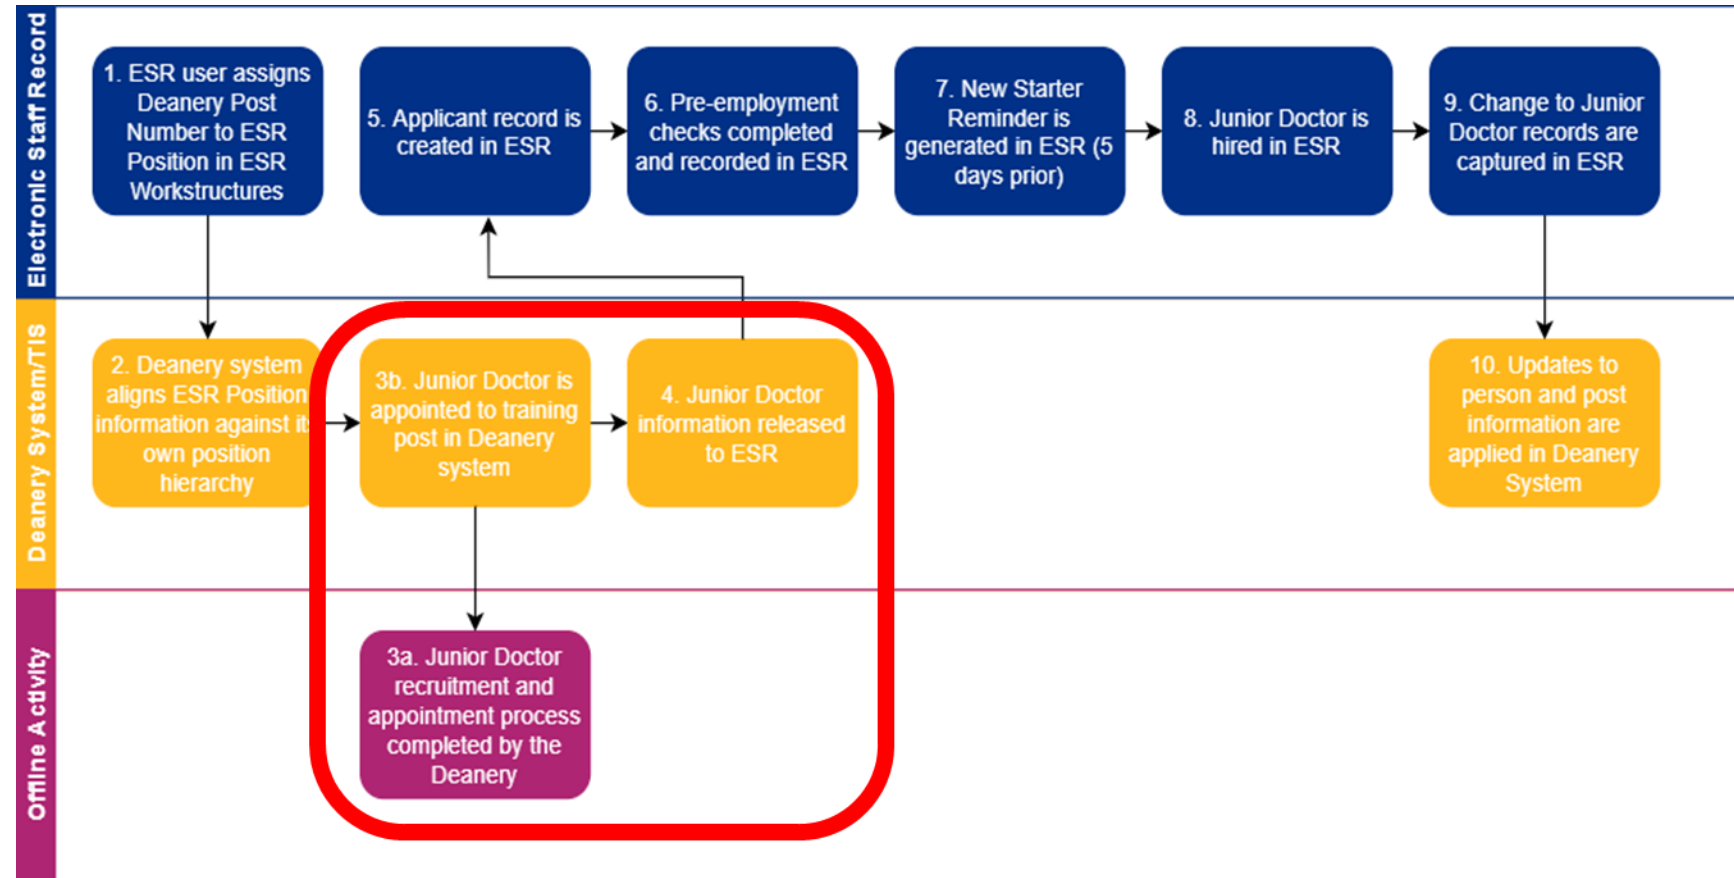

- HEE will provide a list of Deanery Post Numbers (DPNs) to all Trusts, advising which training posts you are responsible for
- The DPNs should then be assigned to your corresponding ESR Positions within the Local Workstructures URP. **There should only ever be 1 DPN assigned to 1 ESR Position**
- Trusts should note this may require ‘de-bucketing’ of your ESR Positions
- Only ESR Positions with a valid DPN will be transferred to TIS as part of the interface

# Step 2: Outbound Process Completes (ESR to TIS)

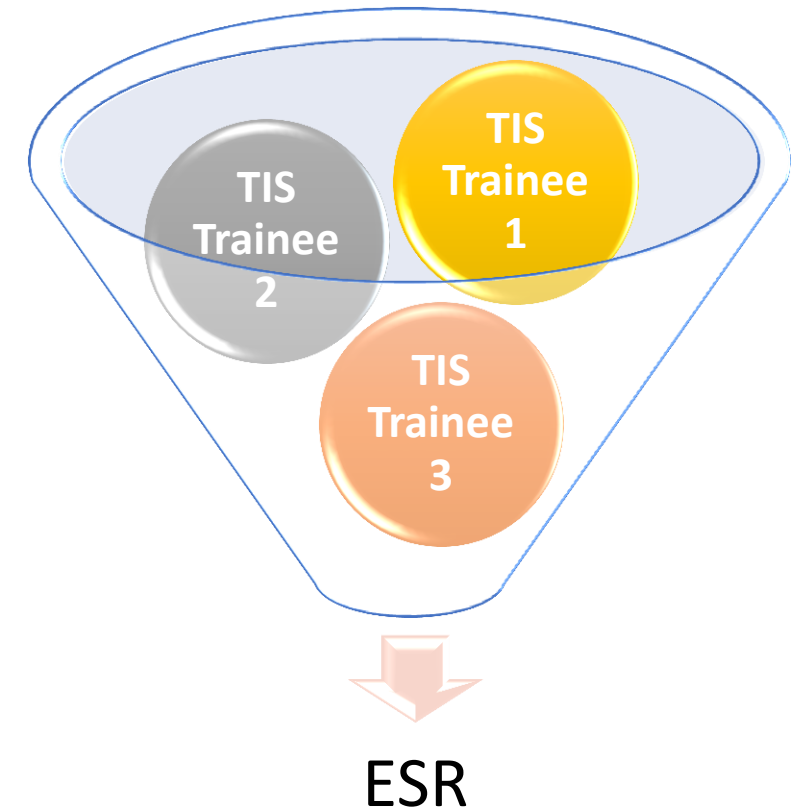

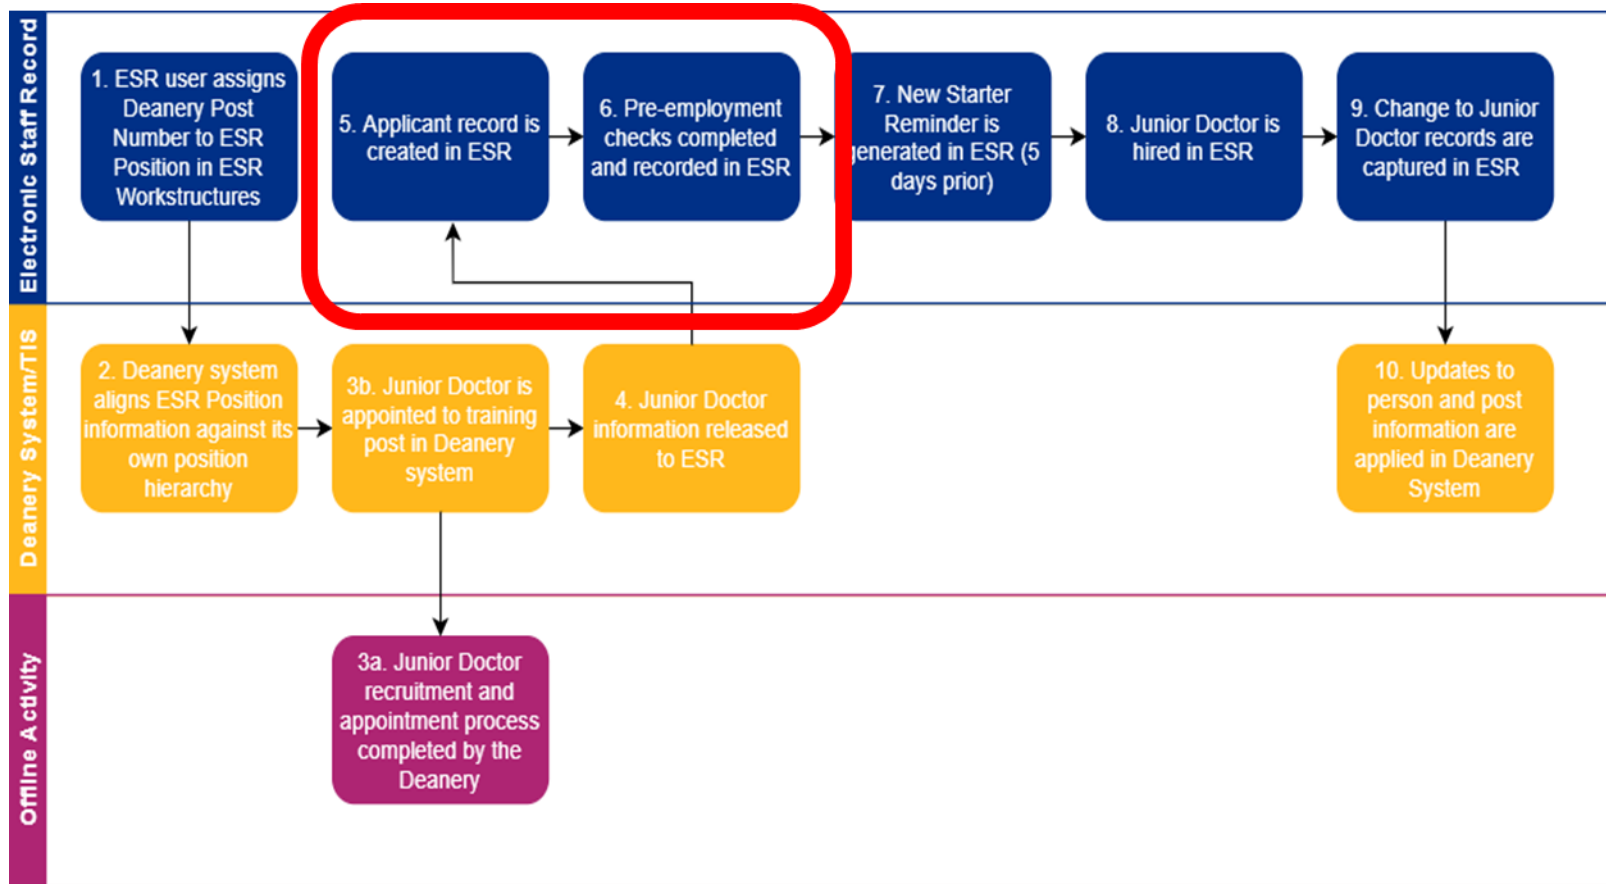

# Step 3a, 3b and 4

- Step 3a & b: Trainee is appointed to a training post and recorded within TIS
- Step 4: Trainee data is released from TIS

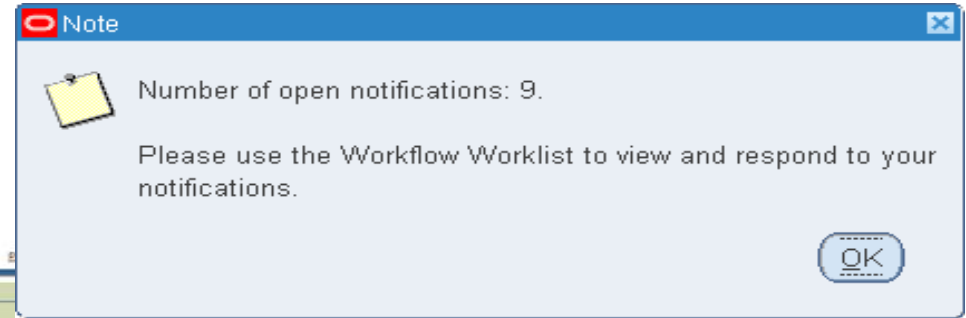

# Inbound Interface Completes (TIS to ESR)

# Step 5: Doctor in Training Record created within ESR

- MSO Role receives a new notification

**NHS DTST**

**Information**  
This notification does not require a response.

**Deanery Applicant Notification**

To: CCN705TestMSO, TestMSO  
Sent: 02-Feb-2012 17:00:31

# Pre-Hire IAT Process Map

\* The 'IAT Request' option to run a non-automated IAT process should only be used if no 100% match using Auto Person Match.

\*\* If the PDS Notification Role has been allocated, the PDS Request Authorisation Notification will be sent to the PDS Notification role holder/s rather than the IAT Initiator.

If PDS is not copied at the point of hire or hire undertaken via Manager Self Service the PDS Notification role holder will be able to action the PDS copy via the Notification received.

\*\*\* If Stat and Mand Ntf role is not allocated, then all the national competencies will be transferred as part of the PDS copy.

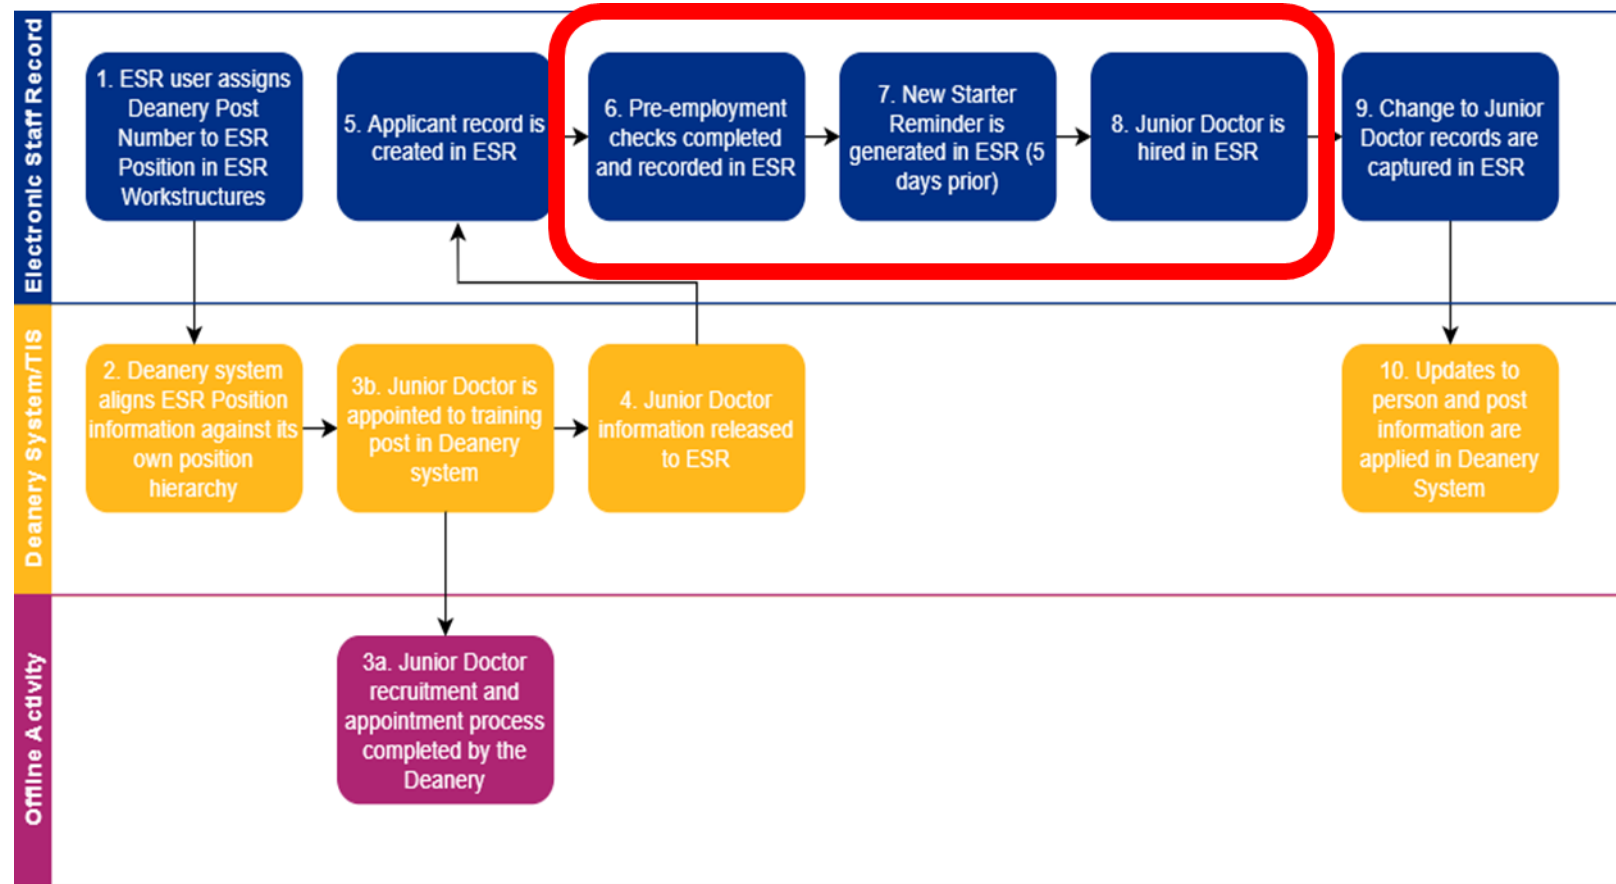

\*\*\*\* Reference request will be only sent if the box was ticked at the point the IAT was initiated by Recruitment (see step \*)

# Reminder: Key Points for Successful IAT

- Ensure the allocation of IAT URP's and Roles
- **Perform IAT at pre-hire stage**
- Ensure a robust process is in place to all notifications:
  - L & D Teams – to manage Stat & Mand Nft.
  - OH Teams – to manage Imms & Vacs data, and record OH clearance
  - MSO – to manage Cash Floor & Annual Leave, Service history for contracts of employment
- Manage all reference requests received and respond to requesting Trust
- Perform Portable Data Set copy for all IAT's at hire stage
- Enable applicants access to ESR Applicant Portal to confirm details and undertake outstanding training where possible
- Ensure previous training is acknowledged and not repeated unnecessarily during induction

# Steps 6, 7 and 8

- Step 6: Employment Checks Completed
- Step 7: New Starter Reminder Notification is generated
- Step 8: Employee is Hired within ESR

# Outbound Interface process completes (ESR to TIS)

- Steps 9 & 10: ESR Changes Flow into TIS (from November 2020 onwards)

# End of the User Journey...

**Questions?**

# Notifications

# Notifications for the Medical Staffing Officer (MSO)

The notification file from TIS will arrive into ESR (NHS Hub) where it will then generate the following to the Medical Staffing Officer (MSO):

## 1. Medical Rotation spreadsheet (or the MEDROT )

This provides a snapshot of all trainees in the current placement and the next placement. It utilises the Type 1 notifications provided in the notification (DNC) file from TIS to ESR. Changes (of the four types) will always be accompanied by a new type 1 i.e. a record that reflects the latest status following the change. So the type 1 records on the Notifications(DNC) file from TIS will be used to refresh the MEDROT.

## 2. Withdrawal, change of projected end date (of current placement) and change of start date (of next placement) and new positions

These are conveyed through workflow notifications that an MSO will receive on ESR. This serves as a prompt for staff to take the necessary action.

## 3. New starter notifications

These are generated by ESR and sent to the MSO 5 days before the start of the rotation, this acts as a prompt to complete the pre hire steps.

# Notifications – Medical Rotation Spreadsheet

**Title:** Medical Training - Medical Rotation Notification

**Trust ID:** 999

**Date of Notification:** 22 Mar 2016

**Body of Notification:**

Below is a link which will take you to the latest Medical Rotation grid supplied by the Generic LETB, as trainees at your Trust are due to rotate to their next placement. Check the details and undertake the necessary steps to either appoint them into their new position or terminate their employee record.

Please Note: Where the details related to the current and or next post holder are blank, this may or may not indicate a vacancy against the position and you should contact your LETB Lead for more information.

[DE ABC 999 MEDROT 20160322 180401 00005271-mamh6y2d9p.xls](#)

To access the information over the link you will need to supply the LETB specific password. Please obtain this from the NHS Team via the Remedy Helpdesk by raising a Service Request FAO: NHS Systems Integration Team

**Click on this link to display the Medical Rotation grid. You will need to raise a Service Request with the ESR Service Desk to ask for a username and password before you can access the MEDROT.**

# Notifications – Medical Rotation Spreadsheet

The Medical Rotation Grid includes:

- Details of current post holder
- Details of next post holder

# Notifications – New Starter

**Title:** Deanery - Jnr. Doctor Starter(s) (999)

**Trust ID:** 999

**Date of Notification:** 01/03/2016

**Body of Notification:** The following medical and dental trainees are due to commence their new placement within the next 5 days. You should ensure that the necessary steps have been taken to hire them into their new positions on the hire date. Please note: If the trainee already occupies a post within your organisation, please remember to action their current employee assignment accordingly. If you are the host trust for the trainee, please ensure that you hire the applicant as an **honorary** employee.

Position Number	Last Name	First Name	GMC Number	Projected Hire Date
32557334	Heathcliffe	Simon	1234567	02/03/2016

# Reminder of the Benefits to Trusts

- Applicant information will be sent to ESR as and when this is captured in TIS, but typically between 13 and 12 weeks ahead of the start date, as TIS is programmed to release the data from 13 weeks;
- The transfer window begins at 12 weeks before projected start date and ends at 2 days before the placement date;
- Appropriate role holders in ESR will be notified of changes to the placement thus prompting them to take the appropriate action;
- Enables the Applicant Portal capability within ESR;
- Facilitates the ESR Pre-Employment IAT process.

# User Support – HEE Contacts

- HEE Regional Office Contacts – for queries around HEE/TIS data quality; applicants; confirmation of local processes; and access to Tableau Exception Reports
  - **Midlands and East:** [programmeanalysis.me@hee.nhs.uk](mailto:programmeanalysis.me@hee.nhs.uk)
  - **South:** [IMSupport.South@hee.nhs.uk](mailto:IMSupport.South@hee.nhs.uk)
  - **London and South East:** [servicedesk@hee.nhs.uk](mailto:servicedesk@hee.nhs.uk)
  - **North:** [tissupport.north@hee.nhs.uk](mailto:tissupport.north@hee.nhs.uk)
- General HEE Enquiries
  - [HEE.Tis@hee.nhs.uk](mailto:HEE.Tis@hee.nhs.uk)
- HEE Website
  - <https://tis-support.hee.nhs.uk/integrations/>

# User Support – Expected Investigation Steps

# Steps for a successful implementation

- Engage with your organisation's ESR Lead
- Engage with other colleagues e.g. those in Workforce, HR, Recruitment, Medical Staffing etc
- Engage with your local HEE Office and request access to Tableau Exception Reports if available
- Review the user support information, including the FAQ document and Implementation Checklist (available on the ESR Hub)
- Perform any ESR Position maintenance as required e.g. assign DPNs, un-bucket positions. For changes of more than 100, the ESR Service Desk mass update facility can be used (please raise a Service Request as appropriate)
- Raise your go live Service Request with the ESR Service Desk

# Final Opportunity for Questions

## Electronic Staff Record

# Appendix

**ESR - A Workforce Service delivered by the NHSBSA**

# Mass Update Requests

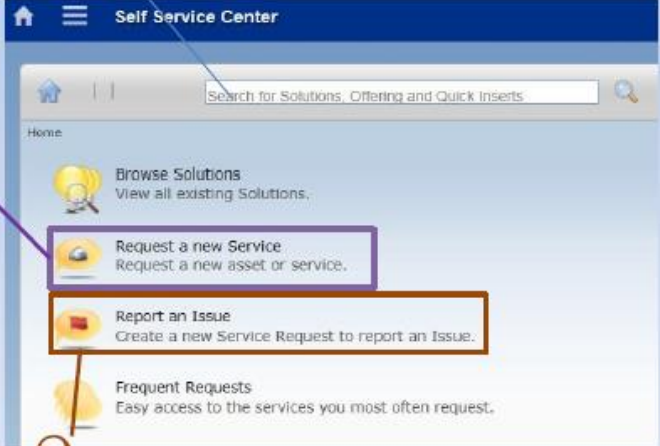

- If required, please ensure any mass update requests are raised in good time and that staff are available to perform the necessary post-processing
- Incorrectly filling out the mass update template may result in the failure of the update, so please ensure this is completed correctly. If you are unsure how to do this, please contact the Support Team who will be able to advise
- Remember: mass updates usually process overnight meaning the error report will be available the day after the mass update was carried out. If further corrections are needed, please bear this in mind when considering the timelines

# Raising Service Requests on the ESR Service Desk

- This is usually carried out by your ESR Lead or other nominated users of the ESR Service Desk
- Go Live SRs and Mass Update requests should be raised as a Work Order under 'Request a new Service'
- Access to the MEDROT spreadsheet should be raised as a Priority 5 Incident under 'Report an Issue'

**Raising a Service Request (SR)**

Did you know you can type in key words from your request and search for the correct SR template using this search bar.

**Work Order**

Is my request asking for something to be activated or changed? ?

Use this option for go live requests.

**How to raise:**  
To enable the flow of data between ESR and your Deanery / HEE Doctors in Training System (TIS) select the offering:

**"Request a Service: Junior Doctors Interfaces"**  
(Path: Request a new Service / AC / ESR Interfaces)

**Questions you will be asked on SR**

- Required By Date

**Questions you will be asked after raising the SR**

- What is Deanery / HEE Office (Region) you wish to interface with?
- Are Doctors in Training Posts unbucketed in ESR?
- Do ESR positions have only unique Deanery Post Numbers linked?
- Please provide an email from the local HEE office or Business Manager confirming they approve the go live request

**Incident – is my request an issue?**

Is there an issue with the files or data from an existing Doctors in Training interface, or do you require your region's Medical Rotation (MEDROT) spreadsheet password? MEDROT passwords are usually given out when processing the implementation request (during go live), but an SR can be raised separately if this does not happen.

**How to raise:**  
**"Report an Issue: Interfaces \ Junior Doctors"**  
(Path: Report an Issue / AC / Interfaces / Junior Doctors)

**Note: Please raise as a Priority 4 or 5.** (Priorities 1 – 3 are reserved for ESR payroll related issues).

**Questions you will be asked on SR**

- Date issue occurred
- Example Assignment/Employee number
- File name / batch name (if known)

Please provide a screen shot where appropriate (e.g. error messages or formatting issues).

Further questions:  
esr.interfaces@nhs.net

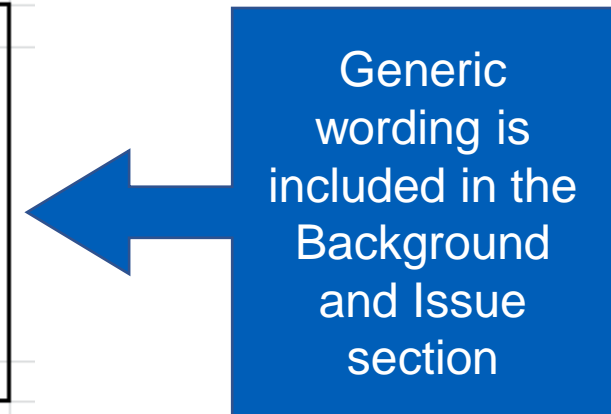

# Raising Your Go Live Service Request

- After you have raised the SR, you will be asked a series of questions to confirm your readiness. These include:
  - 1) All Junior Doctor posts must be unbucketed (unique ESR positions used depending on the role) at the NHS Organisation.
  - 2) ESR positions must be matched to Deanery Posts, and Deanery Post References must be stored on ESR against ESR Positions.
  - 3) All ESR positions that are NOT junior doctor training posts MUST NOT have the Deanery Post Number or Managing Deanery Body fields populated
- You MUST respond to all questions on the SR to confirm your go-live
- The Support Team will attach a DPN report to help you which will show any duplicate positions or those with data accuracy issues

# Example DPN Report

<b><u>Deanery Report Summary</u></b>	
	VPD XXX
	FileName
<b><u>Background</u></b>	
<p>As ESR position data is transferred to Deanery/Local office system (e.g. Intrepid/TIS) as part of the Streamlined Deanery Interface, where a trust has the same DPN on more than one active ESR positions, problems may occur with the interface process. The duplicate posts cause the Deanery/Local office system confusion and may generate multiple applications for the same DPN within a single file.</p> <p>Additionally, it has been indentified that it is possible for the DPN and/or Position Name to contain invalid characters (such as tabs/linefeeds). These data quality issues can result in the record not transferring correctly</p>	
<b><u>Issue</u></b>	
<p>We have established that there are a number of posts within your workstructures that have either duplicate DPNs and/or data quality issues and must be resolved before go-live on the Streamlined Deanery Interface. Duplicates are itemised on the 'Duplicate DPN' tab and data quality issues will be highlighted in red on the 'All DPN Positions' tab.</p>	

Generic wording is included in the Background and Issue section

# Example DPN Report - Continued

<b>Statistics</b>	
No. of ESR Records with Deanery Records	150
No. of Deanery Records linked to multiple Positions	12
No. of data quality issues with DPN	0
No. of data quality issues with Position Name	0

**Advice Notes**

1. To resolve a duplicate DPN please end date the post or remove the DPN from the appropriate position so that our process is not impacted by the duplicate posts issue.
2. To resolve a data quality issue please check the record corresponds to the rules below and correct in the Deanery/Local office system.

For more information, please contact your ESR Deanery Programme Lead.

A DPN format should adhere to the following rules:

- a. Must contain a minimum of 4 parts separated by /
- b. The first part must contain 3 characters (eg deanery prefix MER etc)
- c. The remaining parts must only contain readable ascii text (eg, no control characters, tabs, linefeeds etc, but brackets, commas, etc are allowed).
- d. Each part must contain a value (e.g. MER//123/123 would not be allowed)

A Position Name format should adhere to the following rules:

- a. Must contain exactly 4 parts separated by |
- b. The first part must be numeric
- c. The remaining parts must either be empty or contain only readable ascii text

This section tells you where there are issues

## Example DPN Report – Duplicates Tab

- After having looked at the front page of the DPN report, please navigate to the other two tabs – the ‘Duplicate DPN’ tab and the ‘All DPN Positions’ tab
- The ‘Duplicate DPN’ Tab will highlight all DPNs that have been entered as duplicates, such as the fictitious example below

VPD	Position Number	Position Name	DPN	Managing Deanery Body
XXX	12345678	12345678 Specialty Registrar 123 Cardiology	KSS/A12345/100/STR/123	KSS
XXX	98765432	98765432 Specialty Registrar 123 Cardiology	KSS/A12345/100/STR/123	KSS

- You will need to make sure that all duplicate positions are removed as there must be a 1:1 mapping between DPN and ESR position
- The ‘All DPN Positions’ tab lists all the DPNs you have entered and indicates if there is a data quality issue e.g. incorrect format

# Readiness Checks - Summary

- Remember: All DPNs must be setup correctly with no duplicates or data quality issues in order for you to go live!
- Once this has been resolved, you must confirm your go live status on the SR and answer all questions
- Please be attentive in responding to communication on your SR
- Failure to adhere to the above steps will result in you not going live with the interface

# Thank you

**ESR - A Workforce Service delivered by the NHSBSA**
