Design Assumptions

The following design assumptions have been made and can be applied to all analyses and dashboards:

- 1. All analyses have an export button to enable the user to export to their format of choice.
- 2. All analyses have an 'Add to Briefing Book' button enabled to allow the user to group national analyses together into a board-report type document.
- 3. All dashboards are designed on a screen resolution of 1024 x 768 pixels to prevent horizontal scroll bars being displayed (except where wide tables of data are required).

Examples

Where applicable, the examples included in this document contain fictional data only. The names and other personal details are fictional although look realistic enough to provide a useful example.

Data Quality Dashboard

Description

This dashboard is designed to provide the user with intelligence around a number of Data Quality tests.

Allocation

This dashboard is available to the following URPs:

XXX BI Administration
XXX HR Administration
XXX HR Administration (With RA)
XXX HR Management

System Data Quality Tab

Description

This analysis returns records in ESR that may have a corruption. These include records where a person has multiple primary assignments, or date-tracked values that overlap with each other. These errors can cause issues with Discoverer and with ESR BI, therefore they should be corrected where possible. If unsure how to correct any of the records, users are advised to raise a priority 4 SR ensuring as much information as possible about the records is included.

Prompts

Effective Start Date
Effective End Date

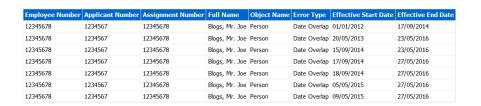

Example Screenshot

This report returns records in ESR that may have a corruption. These include records where a person has multiple primary assignments, or date-tracked values that overlap with each other.

These errors can cause issues with Discoverer and with ESR BI, therefore they should be corrected where possible. Issues with FTE budget value overlaps can be resolved by date-tracking to the period returned in this report (i.e. between the 'Effective Start Date' and 'Effective End Date'), and viewing the budget values on the assignment (from the 'Others' button). Here, delete whichever record is incorrect.

If you are unsure how to correct any of the records, please raise a **priority 4** SR ensuring you include as much information as possible about the records.

Data Quality Trending Tab

Description

This analysis shows data quality trending on a monthly basis over a time period. It returns data as at the last day of each month and is refreshed on a monthly basis.

Supervisor Tab

Description

This analysis detects whether any assignments are in a 'loop' in the supervisor hierarchy. This is where an assignment becomes a supervisor for themselves somewhere along the hierarchy.

Please note that this analysis currently works with primary supervisor only.

Data Items

Assignment Number
Supervisor Assignment Number

Example Screenshot

Assignment	Supervisor Assignment
100001	100002
100002	100003
100003	100001

Note: This analysis works with primary supervisor only at present

Any assignments in a supervisor loop are listed below.

12345678

By clicking the above Assignment Number(s) users will navigate to the Supervisor Loop Detail analysis which provides a more detailed analysis of the results returned by the summary analysis.
