Design Assumptions

The following design assumptions have been made and can be applied to all analyses and dashboards:

1. All analyses have an export button to enable the user to export to their format of choice.
2. All analyses have an 'Add to Briefing Book' button enabled to allow the user to group national analyses together into a board-report type document.
3. All dashboards are designed on a screen resolution of 1024 x 768 pixels to prevent horizontal scroll bars being displayed (except where wide tables of data are required).

Examples

Where applicable, the examples included in this document contain fictional data only. The names and other personal details are fictional although look realistic enough to provide a useful example.

Learning Administration Dashboard

Description

This dashboard is designed to provide the user with intelligence around Learning Administration.

Allocation

This dashboard is available to the following URPs:

XXX BI Administration

XXX Learning Administration

XXX Class Administration

XXX Learning Instructor (only Delegate Status, Class Listing and Sign-In Sheet analyses are available to this URP)

Please note that Learning Instructor and Class Administration URPs only see classes (and delegates) with whom they are associated.

The screenshot displays the NHS Learning Administration Dashboard. At the top, there is a navigation bar with links for Home, Catalog, Favorites, Dashboards, New, Open, and Signed In As. Below this is a secondary navigation bar with tabs for Index, Sign-In Sheet, Class Delegate List, Class Listing, Class Planning, Costing, Course Listing, Delegate Status, e-Learning Tests, Employees w/o Specific Course, and Historical Classes / Enrolment. The main content area is titled "NHS Electronic Staff Record - Business Intelligence". It includes a message stating "Learning Reports are available in the below categories. Click a link to navigate to each report." Below this message are two columns of links. The left column, under the heading "Class Management", contains links for Class Listing, Course Listing, Sign-In Sheet, Candidate Status on Class, Class Delegate List, and Classes / Enrolments not Updated. The right column, under the heading "Analysis", contains links for Learning Monitoring, Delegate Status Analysis, Percentage Trained on Course, Employees without Specific Course, Costing, and Study Leave.

Learning Record (All Delegates)

Description

This worksheet provides users with information regarding classes attended for all delegates based on when the learning took place (rather than current employment status). Where the class was e-Learning then the Date Last Played is used, where the delegate was an external learner then Completion Date is used otherwise the analysis is based on Class End Date.

- For Shared Training Centre (STC) Providers, the Learning Record report will include enrolees from the STC Customer. For enrolees from the STC Customer it will only display the classes that are run by the STC Provider, not the enrolee's entire learning history.
- When the report is run by a STC Customer, the report will include learning records that their employees have completed with the STC Provider.

Apprenticeships Summary

Description

Available on this tab are a number of summary analyses designed to provide high level information of employees undertaking Apprenticeship at a specified report effective date or period. The data returned is for employees whose EIT Apprenticeship details are populated in ESR and does not include those on an Apprentice Job Role which is no longer valid. Organisations are therefore advised to record Apprenticeships data using the Assignment EIT Apprenticeship functionality available in ESR to ensure apprenticeships are being reported correctly. Please note that this tab is also available in the NHS Staff in Post Dashboard.

Cost of Learning

Description

The Cost of Learning analysis is designed to return the total cost of training completed based on the hourly rate of a delegate's primary assignment, taking into account the time taken to complete the training.

Users are able to calculate the predicted cost over a number of years where the time period and renewal frequency is defined by the user.

Data Items

Title	Description
