## Design Assumptions

The following design assumptions have been made and can be applied to all analyses and dashboards:

1. All analyses have an export button to enable the user to export to their format of choice.
2. All analyses have an 'Add to Briefing Book' button enabled to allow the user to group national analyses together into a board-report type document.
3. All dashboards are designed on a screen resolution of 1024 x 768 pixels to prevent horizontal scroll bars being displayed (except where wide tables of data are required).

## Examples

Where applicable, the examples included in this document contain fictional data only. The names and other personal details are fictional although look realistic enough to provide a useful example.

## Payroll Dashboard

### *Description*

This dashboard is designed to provide the user with intelligence around payroll data, specifically deductions and allowances.

This includes:

- Deduction Schedule
- Allowance Schedule
- Net Pay Comparison

### *Allocation*

This dashboard is available to the following URPs:

XXX BI Administration

XXX Finance Administration

XXX Payroll Administration

XXX Payroll Audit

XXX Payroll Super Administration

### *Prompts*

Accounting Period

Element(s)

Employee Number

Assignment Category

Person Type

Employee Person Type

Primary Assignments Only

Organisation Level (1-13)

Allowance/Deduction Type

Staff Group

Job Role

## Index

### *Description*

Payroll dashboard reports are available in three different categories below:

- Allowance & Deduction Schedule
- Payroll Analysis
- Staff Listing

From this tab users can click on links provided to navigate to reports.

## Example Screenshot

The screenshot shows the NHS Payroll Dashboard interface. At the top, there is a navigation bar with 'Home', 'Catalog', 'Favorites', 'Dashboards', 'New', 'Open', and 'Signed In As'. Below this is a breadcrumb trail: 'Index > Allowance Schedule > Allowance Schedule Detail > Deduction Schedule > Deduction Schedule Detail > Employee Detail > Net Pay Comparison > Pay Analysis > Pay History > Staff List > Age'. The main content area is titled 'NHS Electronic Staff Record - Business Intelligence'. A message states: 'Payroll Reports are available in the below categories. Click a link to navigate to a each report or tab.' There are two main sections: 'Allowance & Deduction Schedule' and 'Payroll Analysis'. The 'Allowance & Deduction Schedule' section contains links for 'Allowance Schedule', 'Allowance Schedule Detail', 'Deduction Schedule', and 'Deduction Schedule Detail', each with a brief description. The 'Payroll Analysis' section contains links for 'Net Pay Comparison', 'Pay Analysis', 'Pay History', and 'Pay Balances', each with a brief description.

## Allowance Schedule Tab

The Allowance Schedule Tab provides intelligence on employee allowances, totalled and grouped by Position and Accounting Period.

### Description

This analysis is designed to show employee allowances totalled by position and accounting period.

*Note: In order to run the analysis, an accounting period must first be entered.*

### Data Items

Title	Description
Assignment Number

## Net Pay Comparison Tab

This enables the user to compare the net pay of two payroll periods for each assignment. A value must be provided to restrict the return of assignments (e.g. setting the 'Type' to 'Amount' and 'Value' to '1000' would return only assignments that have a difference of more than 1000 or less than -1000 over the two periods). A type of 'Percentage' may also be used.

Clicking the assignment number will open a new window within which the net pay (grouped by element) is displayed for both periods to enable the user to understand why the difference has occurred.

### Prompts

## Pay Analysis Tab

This analysis is designed to show the gross and net pay of each assignment over a number of payroll periods. Users are able specify a number of pay periods along with filtering on Net/Gross pay.

### Description

Gross Pay is defined as any elements paid with a classification name of 'Information' or 'Earnings'. If ER Pension is enabled, ER contributions to the NHS pension scheme and ER contributions to any local pension scheme are included by including any elements with a classification name of 'Employer Charges' or name including the word 'Pension'.

### Prompts

- Payroll Period(s) (default: Latest Period)
- Net Pay (default: is equal to X)
- Gross Pay (default: is equal to X)
- Gross Pay + Direct Payments (default: is equal to X)
- Net Pay Excl Direct Payments( default: is equal to X)
- Assignment Number
- Include ER Pension in Gross? (default: No)

## Recalled Leavers Tab

### Description

This analysis provides users with information in order to identify pensionable payments made to terminated employees after the last standard payroll process date associated with the employee's termination, i.e. after total pensionable pay details would normally have been sent to the pensions agency. Please note that this analysis runs in Real Time therefore may take longer to run than other BI analyses.

## Payslip Messages Tab

### Description

This analysis enables users to report on the messages saved in ESR that will be attached to an employee's payslip upon production.

Please note that this analysis is created using a Real Time subject area and matches the Discoverer version. The only difference is that the Discoverer version will return duplicate rows where employees have multiple assignments and the BI report will not return the same duplicates. This is because the report is employee based and should not return duplicates. All employees in the Disco report are however returned in the BI analysis.

### Prompts

## Pay Multiples Tab

### Description

This analysis supports users in calculating the ratio between a CEO or highly paid director to the rest of the organisation. This can be useful for requirements such as the Pay Multiples report (with guidance from the HFMA) or the CEO to Worker Ratio report. The analysis provides the annual salary for each employee as at a specific date (in order to lessen the impact of new starters, leavers and hours changes), as well as any other pay paid to them over the period (e.g. overtime etc).

By default the analysis will return data related to the previous financial year therefore only employees employed as at the end of the period (e.g. 31 March) are included.

The effective date for salary, employee and assignment details will always be the last day in the period (31 March by default). The salary for each employee is annualised by dividing it by their FTE.
