Design Assumptions

The following design assumptions have been made and can be applied to all analyses and dashboards:

1. All analyses have an export button to enable the user to export to their format of choice.
2. All analyses have an 'Add to Briefing Book' button enabled to allow the user to group national analyses together into a board-report type document.
3. All dashboards are designed on a screen resolution of 1024 x 768 pixels to prevent horizontal scroll bars being displayed (except where wide tables of data are required).

Examples

Where applicable, the examples included in this document contain fictional data only. The names and other personal details are fictional although look realistic enough to provide a useful example.

Supervisor Hierarchy Tab

Description

This tab is designed to provide a hierarchy graph showing a user those employees that are part of a supervisor hierarchy for a particular organisation. A supervisor hierarchy graph can only be generated for organisations with 200 or fewer assignments. An assignment count is provided for those assignments with and without a supervisor.
