

NHS ESR Data Quality Education 2019

October 2019

It's your **ESR**

Data Quality in ESR

Data Quality within ESR underpins all aspects of Workforce and Payroll planning and decision making. Good data quality enables:

- Accurate Workforce Planning
- Organisations to quickly identify issues or non-issues across the organisation
- Improved decision making
- High quality statutory returns data

With poor data quality comes a lack of trust in the data presented, inefficiencies (with remedial action often taking considerable effort) and poor decision making.

Key issues in ESR:

- Recruitment Source is NULL
 - Important due to the on-going discussions around leaving the European Union.
- Destination on Leaving is NULL
 - Important due the current recruitment and retention pressures the NHS is experiencing.
- Ethnic Origin is NULL
 - Important due to the upcoming Ethnicity Pay Gap reporting.

Questions:

Are there any plans to create CQC reports dashboard or report? This will save lots of time for the staff.

A: Yes, we are currently liaising with the CQC regarding the best way ESR can support organisations in completing the CQC return. The CQC are currently conducting a review of the Provider Information Request template and once complete we will look at how a dashboard can support organisations in completing it.

ESR NHS Data Quality Dashboard

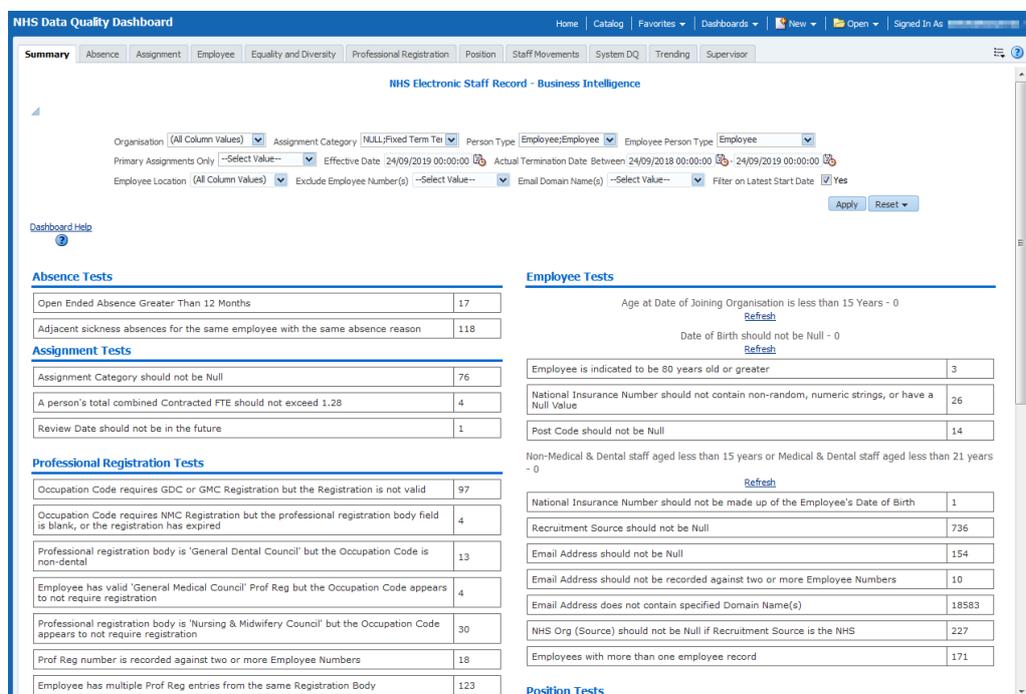

The Data Quality Dashboard was initially designed to replicate the monthly WoVEn reports produced by NHS Digital. Since its introduction a number of additional validations have been added to enable organisations to monitor all aspects of their data from missing email addresses to incorrect Registration details.

Dashboard Help

Absence Tests

Open Ended Absence Greater Than 12 Months	17
Adjacent sickness absences for the same employee with the same absence reason	118

Assignment Tests

Assignment Category should not be Null	76
A person's total combined Contracted FTE should not exceed 1.28	4
Review Date should not be in the future	1

Professional Registration Tests

Occupation Code requires GDC or GMC Registration but the Registration is not valid	97
Occupation Code requires NMC Registration but the professional registration body field is blank, or the registration has expired	4
Professional registration body is 'General Dental Council' but the Occupation Code is non-dental	13
Employee has valid 'General Medical Council' Prof Reg but the Occupation Code appears to not require registration	4
Professional registration body is 'Nursing & Midwifery Council' but the Occupation Code appears to not require registration	30
Prof Reg number is recorded against two or more Employee Numbers	18
Employee has multiple Prof Reg entries from the same Registration Body	123

Employee Tests

Age at Date of Joining Organisation is less than 15 Years - 0 [Refresh](#)

Date of Birth should not be Null - 0 [Refresh](#)

Employee is indicated to be 80 years old or greater	3
National Insurance Number should not contain non-random, numeric strings, or have a Null Value	26
Post Code should not be Null	14
Non-Medical & Dental staff aged less than 15 years or Medical & Dental staff aged less than 21 years - 0 Refresh	
National Insurance Number should not be made up of the Employee's Date of Birth	1
Recruitment Source should not be Null	736
Email Address should not be Null	154
Email Address should not be recorded against two or more Employee Numbers	10
Email Address does not contain specified Domain Name(s)	18583
NHS Org (Source) should not be Null if Recruitment Source is the NHS	227
Employees with more than one employee record	171

Position Tests

Organisations should, where possible try to monitor this dashboard frequently to address any errors as an when they occur rather than waiting for the monthly WoVen process to highlight issues.

Where a significant number of errors reoccur for the same validation, organisations should consider if a change is required to the local process linked to the validation. (E.g. A high number of missing email addresses for new starters each month)

If you have any suggestions for additional Data Quality Validations which you think should be added to the national Dashboard then please raise an SR.

Questions:

Is there a way of adding Email domain names so they do not feature as an error?

A: Yes, the Email Domain Name Prompt should be used to enter valid email address domains and these will then be excluded from the DQ count. Multiple domains can be entered or selected.

Is there a test for multiple open disability records that contradict? This is a huge data quality issue, especially as employees own that data and ESS isn't clear to end date existing entries.

A: Not currently, if this is something users think would be beneficial then an SR should be raised and it will be progressed in the normal way.

What do you mean by workplace org code?

NHS ESR Data Quality Education 2019

October 2019

It's your ESR

A: Where employees are based in a workplace that is different from their employing organisation this can be recorded in The Workplace Org Code field. This satisfies not only the Data Warehouse requirement to be able to report on a person's actual Workplace Organisation as distinct from their Employing Organisation but also NHS Digital reporting requirements, NHS Improvement Model Hospital activity unit costs and for calculating NHS Litigation Authority premiums.

In DQ Dashboard for positions checking for area of work, we have example of it reporting a frozen end-dated positions. Is this correct?

A: The position tests are designed to return populated positions only, if other restrictions are required please raise an SR in the normal way.

With regard to the dashboard prompt values traveling across tabs, how do we turn this off and can this be adjusted dashboard by dashboard?

A: This is set nationally so if you find this is causing an issue on an NHS Standard Dashboard please raise an SR in the normal way. If this is required for a local dashboard it can be turned off by editing the dashboard, selecting the dashboard prompt properties (in the upper right corner of the prompt) and setting the scope from 'Dashboard' to 'Page'.

Can we make leaving reason and destination on leaving mandatory fields for processing a termination on self-service?

A: Leaving Reason is a mandatory field when ending employment through self-service, if there are any other requests around terminations in self-service please raise an SR in the normal way.

When I run the Data Quality dashboard, it shows errors such as 'assignment category should not be Null' but when we check the employee on ESR the assignment is 'terminate process assignment'. Is there a way we can exclude these?

If an assignment status dashboard prompt is required please raise an SR in the normal way.

When saving prompts on national dashboards are they saved for the user only or staff in the URP?

A: Either, this is a setting when saving the customisation.

If we save customisation, won't that keep the dates static at the point of saving?

A: Yes, this is unavoidable so if using customisations, the date should be set as required after applying the saved customisation.

Dashboard Help

Clicking Dashboard Help link will provide further details on the analysis through the online guide to ESRBI Dashboards:

Data Quality Dashboard

Description

This dashboard is designed to provide the user with intelligence around a number of Data Quality tests.

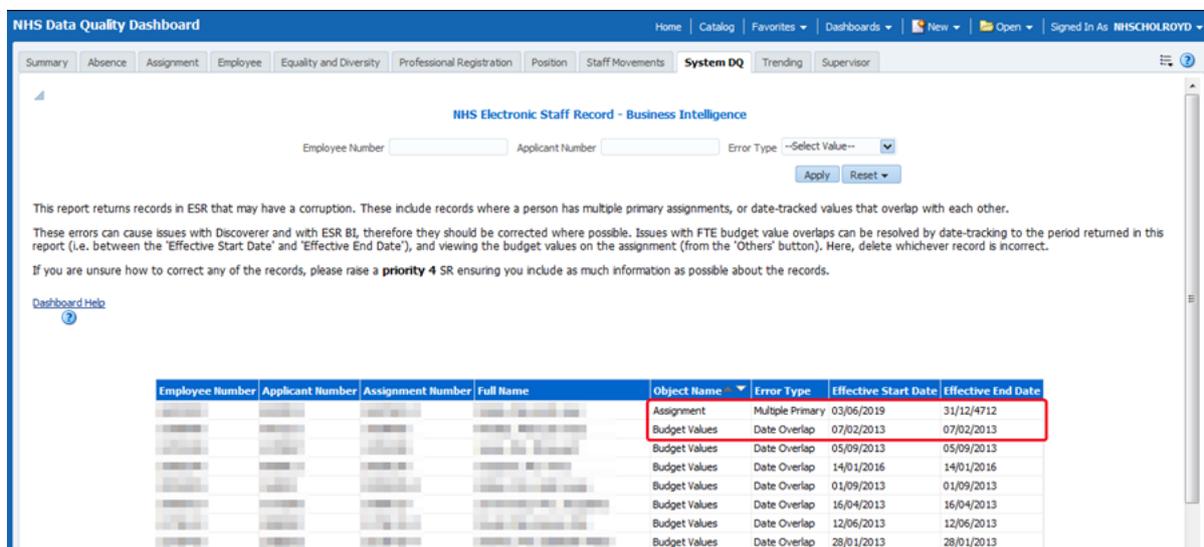

Allocation

NHS ESR Data Quality Education 2019

System Data Quality

This analysis returns records in ESR that may have a corruption. These include records where a person has multiple primary assignments, or date-tracked values that overlap with each other. These errors can cause issues with ESR BI, therefore they should be corrected where possible. If unsure how to correct any of the records, users are advised to raise a priority 4 SR ensuring as much information as possible about the records is included.

Summary | Absence | Assignment | Employee | Equality and Diversity | Professional Registration | Position | Staff Movements | **System DQ** | Trending | Supervisor

NHS Electronic Staff Record - Business Intelligence

Employee Number Applicant Number Error Type --Select Value--

This report returns records in ESR that may have a corruption. These include records where a person has multiple primary assignments, or date-tracked values that overlap with each other.

These errors can cause issues with Discoverer and with ESR BI, therefore they should be corrected where possible. Issues with FTE budget value overlaps can be resolved by date-tracking to the period returned in this report (i.e. between the 'Effective Start Date' and 'Effective End Date'), and viewing the budget values on the assignment (from the 'Others' button). Here, delete whichever record is incorrect.

If you are unsure how to correct any of the records, please raise a **priority 4** SR ensuring you include as much information as possible about the records.

				Budget Values	Date Overlap	12/06/2013	12/06/2013
				Budget Values	Date Overlap	28/01/2013	28/01/2013

Trending

This analysis shows data quality trending on a monthly basis over a time period. It returns data as at the last day of each month and is refreshed on a monthly basis. Clicking on a data point on the graph will update the below table to show the individual tests that make up the value. The change column shows how the figures have changed over the period selected.

Note: Trending data is from February 2018 onwards.

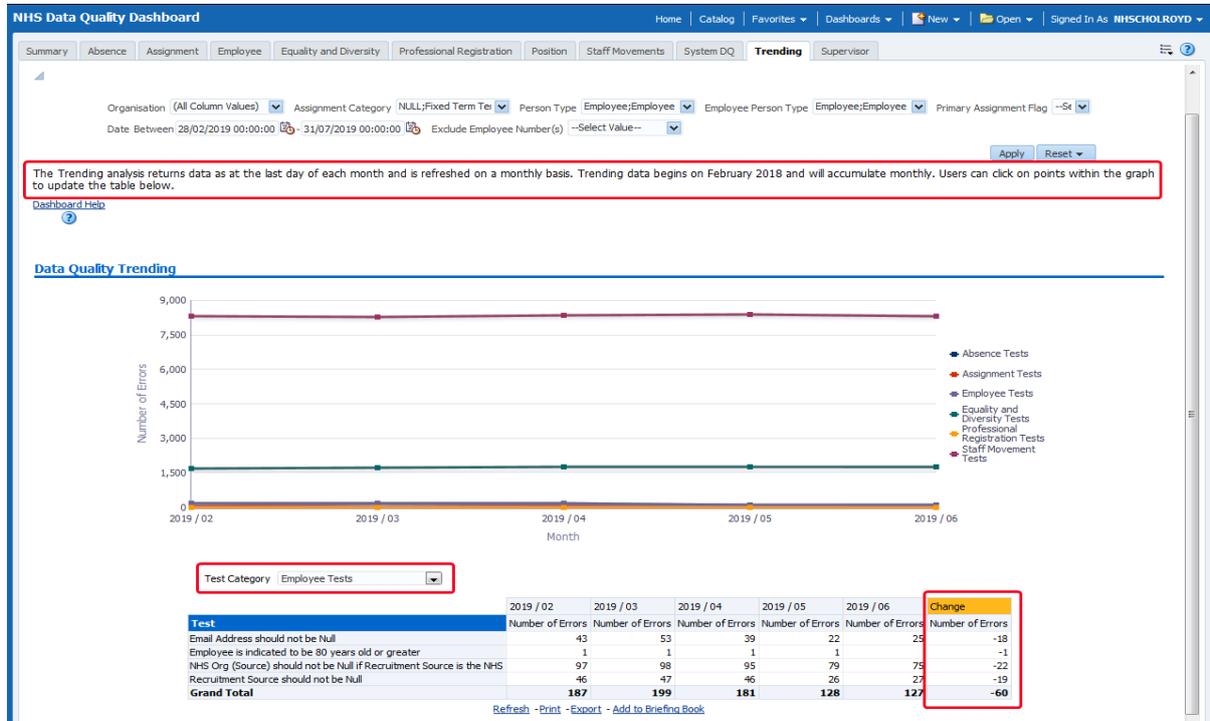

Navigation: Dashboards - NHS Data Quality Dashboard>Trending

NHS ESR Data Quality Education 2019

October 2019

It's your ESR

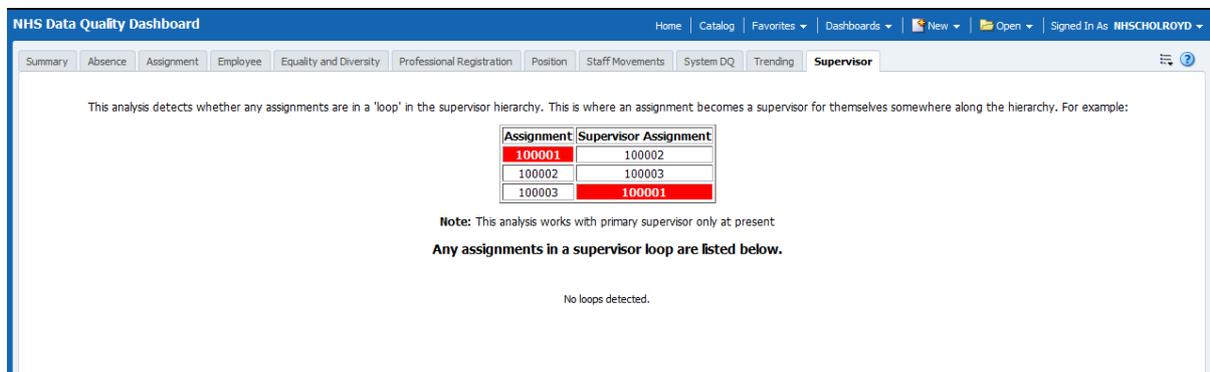

Supervisor

This analysis detects whether any assignments are in a 'loop' in the supervisor hierarchy. This is where an assignment becomes a supervisor for themselves somewhere along the hierarchy.

Please note that this analysis currently works with primary supervisor only.

Questions:

NHS ESR Data Quality Education 2019

October 2019

It's your ESR

On the System DQ tab of the Data Quality dashboard can you look at positions rather than assignments?

A: All current System DQ tests are assignment based.

NHS Recruitment Dashboard

Applicant and Vacancy Listing

This tab contains two analyses designed to show applications and vacancies that are open as at the effective date. These may be used to tidy up applications and vacancies going unused in ESR.

Vacancy Opened Date Between Applicant Number Vacancy Name
 Recruiting Organisation (All Column Values) Applicant Status Vacancy Status Effective Date 09/09/2019 00:00:00

This analysis is designed to show applications and vacancies that are open as at the effective date. It may be used to tidy up applications and vacancies going unused in ESR.

Open Applications

Vacancies without Applications

Open Applications

This analysis is designed to show vacancies still open as at an effective date (default: Today) along with applicants.

Applicant Status	Status Start Date	Status End Date	Termination Reason	Date Application Received	Vacancy Opened Date	Vacancy Closed Date	Application Last Updated Date	Projected Hire Date	Vacancy Status

NHS Workforce Information Verifier

The Workforce Information Verifier Dashboard has been developed to help identify possible discrepancies between Occupation Code, Staff Group/Job Role and Pay Band that may exist within Assignments and their related Positions held in the ESR.

The tool was initially created in 2013 in partnership with NHS Digital to assist organisations in improving their data quality. It has since been replicated in BI meaning that it can be run as and when required to see the 'latest picture'. The formulas within the analysis are updated after each NWD release to reflect changes to the national workforce dataset, as well as any other ad-hoc changes which may be required as a result of trust feedback.

Any changes to the Verifier tool need to be considered by WIRG before we can implement into ESR BI. Queries or requests for change should be sent to enquiries@nhsdigital.nhs.uk

Questions:

Is the Workforce Information Verifier available as a standalone report? We need to know if combinations are correct before we actually create the position on ESR.

A: The verifier is available as an excel spreadsheet on KBase should organisations wish to check combinations prior to creating positions on ESR.

Do we still need the T matrix tests in Workforce Information Verifier?

A: No, the T Matrix is no longer used by NHS Digital. The T Matrix tests have been removed from the Dashboard.

NHS Data Analysis Reporting

As well as the DQ reports available through ESRBI, reports are also sent on a monthly basis to designated contacts at each organisation (with a contact).

These are produced by the NHS Central Team>Data Analysis Team and assist with Registration monitoring in ESR as well as Unique ID Monitoring.

- NMC Report
- GMC Report
- HCPC Report
- Unique ID Report

Further information on all four reports can be found in the HR Best Practice Guide on [KBase](#).

Some organisations don't have a designated contact and therefore are not receiving these reports. Please check that somebody within your organisation is receiving these on a monthly basis. If not, please contact esr.datateam@nhs.net

Questions:

NHS ESR Data Quality Education 2019

October 2019

It's your **ESR**

Can there be more than one designated contact per report (NMC, GMC, ETC) per trust?

A: Yes, please email the above address to discuss requirements.
